TeraMedica and eCare Solutions Enable Patients and Payers to Securely Share Medical Images and Clinical Digital Content in a Personal Health Record Portal

Joint Solution Drives Personalized Medicine and Quality of Care

MILWAUKEE, Wisconsin, October 16, 2006—TeraMedica Healthcare Technology announced today that they will enter into a joint marketing agreement with eCARE Solutions Inc, Personal Health Record (PHR) provider. This partnership delivers a unique approach to providing a comprehensive image-enabled Personal Health Record. The joint solution allows caregivers and patients, timely access to relevant patient information, ultimately helping improve patient safety and care, while increasing efficiency and reducing costs, According to TeraMedica CEO, Jim Prekop. “We see this PHR development as building on our proven success of delivering Electronic Medical Records in the Provider Marketplace with an image enabled program of the eCare PHD””.

TeraMedica’s Evercore® solution, integrated with the eCare Personal Health Desktop® (PHD), allows physicians and patients to instantly access medical images such as X-rays and MRI scans or Cardiology exams, as well as other types of clinical digital content such as electronic reports, from a patient’s existing Personal Health Record (PHR) desktop.

“Patient’s medical records belong to the patient. eCare has developed a private secure storage space where personal health data can be safely stored and readily available in any situation, which increases patient safety and enables providers and our disease and lifestyle coaches even more valuable information to work with.

“We are constantly striving for market-based innovation that brings true value to our health advancement partners and consumers”, states Gavin Quinnies, president of eCare

eCare Solutions Inc,
250 S. Main Street, Thiensville WI 53092

Solutions. “This partnership with TeraMedica brings the challenge of centralizing each consumer’s images into their own personal health record one step closer to reality”.

eCare’s Personal Health Desktop truly customizes the information for each patient by providing proactive health and risk resolution guidance and many other practical tools with their Road to Wellness and Risk Resolution Guidelines. “This partnership creates a best in breed opportunity for the marketplace”, says Paul Markham, VP Global Strategy and Marketing, TeraMedica.

About TeraMedica

TeraMedica provides medical informatics that will transform the doctor and patient relationship. TeraMedica offers a broad range of software that collects digital medical images from diverse data sources across vast health care systems and manages them in a single patient snapshot. TeraMedica is privately held and is headquartered in Milwaukee, Wis. TeraMedica is committed to providing technology solutions to the health care field that enhance patient care.

About eCARE Solutions

eCare Solutions is a business-to-business company providing solutions for health management, predictive modeling of health risk exposure and health risk cost avoidance.

Established in 1998 by G. Raymond Gavery, M.D., eCare Solutions’ mission is to develop and deliver technology-enhanced solutions for addressing the health care and health benefits concerns of corporate customers. eCare Solutions’ core product, eCareConnect, offers a broad range of lifestyle and diseases management applications with a comprehensive patient centric health information system. eCare Solutions also provides a full compliment of health risk management services such as disease management, health coaching, on site health centers, health promotion, and health risk assessment for municipal, medical, managed care, insurance and corporate clients.
